We are aware of this one, I guess it does not only affect issue preview but other previews too.

I'd like to remove the :get method too and to include non-regression tests using e.g. Capybara because we break JS too often and there is more and more client code included in Redmine source.

Include capybara for integration tests

Thanks for pointing this out Toshi, although there haven't been that much tests produced afterwards alas :(

I tried and failed, if you have an idea I need help, see my bottle [Need help making Capybara + selenium with Ajax working](#) :)

### #5 - 2013-01-12 15:45 - Etienne Massip
