Description

Hi,

the hotkey (e) doesn't work as expected. If I open a ticket and press alt+e (in IE) or alt+shift+e (firefox), the link edit get a focus, but the script isn't triggered.

Best regards,
Daniel

Any ideas? Maybe this is caused by the duplicate declaration of the hot key by the duplicated edit bars?

Still reproduce able with newer JS libraries?
Maybe this one could find it's way in 2.3.1 as a bug fix.

There was duplicate accesskeys indeed. This is fixed in [r11755](r11755), thanks for pointing this out.
