<b>Description</b>			
<p>Hi, it's me again,</p> <p>Today's Bug: Colleague created a new ticket with attachment and its description. But she forgot the title.</p> <p>The regular warning came up, to insert a title. That's fine. BUT the attachment was already fixed. And the description is missing. So it is missing in the final ticket. The attachment is uploaded correctly. It's reproducible. See Screenshots.</p> <p>Assumption: when the warning comes up, the according field is not taken over correctly.</p> <p>System: Windows7/IE Desktop Ubuntu Linux/Redmine 2.1.0 devel (from GitHub), Ruby 1.8.7, Rails 3.2.8, MySQL</p> <p>Thanks a lot for the great tool and the support.</p>
