Redmine - Defect #12732

Serveroverload after Gantt PNG export

2013-01-04 14:10 - Daniel Felix

Resolution:	Duplicate	**Affected version:**	

Description

Hi,

I encounter some misbehaviour from redmine, if I export a GANTT to PNG.

This cause a overload (ruby process ~94%) on my testsystem.
Even with 1 month duration and only 5 tickets. This seems to be a general problem of this export.

If I export the same data as PDF, everything is fine.

Those bug force me to kill the ruby process, the whole server would otherwise collaps.

Best regards,
Daniel

- Status changed from New to Closed

- Resolution set to Duplicate

Hi Jean-Philippe,

yeah this is a duplicate. The same things as described in [#12480](#12480) happen on my machine too. Thanks for this hint.

Best regards,
Daniel
