

Redmine - Defect #12741

wiki syntax help link is shows as plain text

2013-01-04 17:55 - Terence Mill

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.0
Resolution:	Cant reproduce		
Description			
The new link implementation in jstoolbar came with r1190 . Now i see the <a href link plaintext instead of a link button.			

History

#1 - 2013-01-04 18:07 - Terence Mill

I copied out the html content block with the erro prone code

```
<p><input name="commit" type="submit" value="Speichern">
  <a accesskey="r" href="#" onclick="submitPreview(%22/projects/sas/wiki/2012_Aprilrelease/preview%22, %22wiki_form%22, %22preview%22); return false;">Vorschau</a></p>
<script type="text/javascript">
//&lt;![CDATA[
var wikiToolbar = new jsToolBar(document.getElementById('content_text')); wikiToolbar.setHelpLink('&lt;a href=
\"/help/wiki_syntax.html\" onclick=\"window.open(&quot;/help/wiki_syntax.html&quot;;, &quot;&quot;;&quot;resizable=yes, location=no, width=300, height=640, menubar=no, status=no, scrollbars=yes&quot;); return false;\"&gt;Textformatierung&lt;/a>'); wikiToolbar.draw();
//]]&gt;
</script>
</form>
```

#2 - 2013-01-08 19:09 - Jean-Philippe Lang

- Resolution set to Cant reproduce

Works for me. Are you using any plugin for text formatting?

#3 - 2015-10-02 02:16 - Go MAEDA

- Status changed from New to Closed

Probably there is a plugin because a emoticon icon can be seen on the screenshot. Maybe the problem was caused by the plugin. Closing.
