Resolution:	
Description	
<p>This gives the ability to extend the custom queries, to display multi-values in the issues tab columns. Like watchers for example, issues relations etc.</p> <p>The patch proposed is for Rails V1.2.1</p> <p>This patch is un-useful unless to add something like that in the @@available_columns array of app/models/query.rb : QueryColumn.new(:watchers)</p>
