Redmine - Feature #12815
implement commit keyword to set or to increase issue done ratio of referenced ticket

2013-01-11 16:09 - Florian S.

Description

maybe adding some (customizable) keywords to set issue done ratio to a given value would be fine:

text for commit refs #12345@done +10
=> add 10 percent to issue done ratio

text for commit refs #12345@done 90
=> set issue done ratio for ticket to 90 percent

text for commit refs #12345@done -10
=> subtract 10 percent from issue done ratio - sometimes things go wrong and there is more work to do than it seemed before:::

just as a small example.

... and again: thanks to the redmine team for the great work! :-)
