

Redmine - Defect #12851

"Parent task is invalid" while editing child issues by Role with restricted Issues Visibility

2013-01-15 12:37 - Happy Mouse

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues permissions	Estimated time:	0.00 hour
Target version:	2.2.2	Affected version:	2.2.1
Resolution:	Fixed		

Description

What steps will reproduce the problem?

1. create Role with Issues Visibility = "Issues created by or assigned to the user" and "Manage subtasks" permission

2. create some User account with that Role for a project

3. create parent issue, **not** created or assigned to that User (so User will **not** be able to access it)

4. create child issue, assigned to that User (so User will be able to access it)

5. log in to the User account

6. try to edit the child issue (i.e. simply changing its Status)

What is the expected output?

User should be able to edit the issue, as long as its parent task id is not modified.

What do you see instead?

"Parent task is invalid" error message.

Possible workaround

Remove "Manage subtasks" permission.

Unfortunately, this will also prevent User from creating child issues to his own parent issues.

But "Related issues" is not affected by this bug, so it can be used instead of child issues.

Environment

Redmine version2.2.1.stable

Ruby version1.9.3 (i686-linux)

Rails version3.2.11

Environmentproduction

Database adapterMysql2
