<b>Description</b> I searched to find an option to hide sub-tasks (tickets that have parent tickets) in the tickets - view. It seems as if there is no possibility to do this.  Filtering "parent-task" "none" and also filtering for special sub.-tasks "parent task" "is" "1234"  would be fine.  Maybe this can be added in one of your next releases?			
<b>Related issues:</b> Is duplicate of Redmine - Feature #9992: Ability to filter issue subtasks in ... <span>New</span>

This could be solved by adding some filter by parent task which provides:

- 1. filter by parent task id is equal to
- 2. filter by parent task id is not equal to
- 3. filter by parent task id is not null (has parent tasks)
- 4. filter by parent task id is null (no parent tasks)

What do you think about this?
