Redmine - Defect #12867

After creating a new wiki page, the project administrator cannot update that page

2013-01-16 13:37 - Marius-Constantin Postolache

Status:	Closed		**Start date:**	
Priority:	Urgent		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Wiki		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	2.1.0

Description

I have installed on a CentOS-6.3 Linux distribution the folowing:
Environment:
Redmine version   2.1.0.stable
Ruby version   1.8.7 (x86_64-linux)
Rails version   3.2.9
Environment   production
Database adapter   MySQL
Redmine plugins:
redmine_logs   0.0.5
wiking   0.0.3

After creating, as an administratot, a new wiki page, that page cannot be updated anymore, even by the administrator.

Adter editing the wiki page, if i click on "Preview" button, the displayed content is the one that should be displayed. So, only i submit the wiki page form, the modifications are not saved.

Please help.

History

Redmine-2.1 is not compatible with Rails-3.2.9. You need Redmine-2.2 instead (and actually you need to run Rails-3.2.11 which fixes critical security issues.)

Thanks for the quick feedback. I will make the proper modifications tonight and get back with the results. Thanks again.

#3 - 2013-01-19 01:14 - Marius-Constantin Postolache

- Status changed from New to Resolved

Thanks.

That solved the problem.

New Redmine information:
Environment:
Redmine version   2.2.1.stable
Ruby version   1.8.7 (x86_64-linux)
Rails version   3.2.11
Environment   production
Database adapter   MySQL
Redmine plugins:
no plugin installed

Thanks again

#4 - 2013-01-19 05:15 - Mischa The Evil

- Status changed from Resolved to Closed

- Resolution set to Invalid

Thanks for the feedback.
