Description

Trac most common wiki links syntax is :

```
[ wiki:pageName Go to page name ]
```

It should be converted in textile to :

```
[ [ pageName|Go to page name ] ]
```

but is currently converted to :

```
[ [ pageName ] ]
```

which is a loss of information.

Attached patch fixes the issue.

PS : notice the space voluntary introduced to be able to past textile syntax here. I can't find any way to escape it, < pre > does not work at least, nor < code >
