

Redmine - Feature #12875

Wiki links to Overview/Activity/Roadmap/Issues/Documents/Files/News/Forums/etc of a particular project

2013-01-17 07:14 - Stanislav German-Evtushenko

Status: New	Start date:

Target version:	
Resolution:	
Description It is possible to link a particular document/issue/wikipage/etc using Wiki syntax currently but there is no way to link to a list of news/issues/etc. Would be nice to be able to link Overview/Activity/Roadmap/Issues/Documents/Files/News/Forums/etc of a particular project, for example: <code>[[project1::issues]]</code> , <code>[[project2::news]]</code> , <code>[[project3::documents]]</code> And in addition to that wiki index link would be also nice to have, for example: <code>[[project3::wiki_index]]</code>

Isn't this implemented already through issue [#7409 \(1.2.0\)](#)?

That issue is about links to specific tasks/versions/documents/etc. This issue is about links to list of tasks, list of documents, list of news, etc.
