Description

Currently, the issue visibility can be set by role with 3 options only:

- 1. All issues
- 2. All non private issues
- 3. Issues created by or assigned to the user

It's better if can enable/disable the issue visibiltiy to a role by issue tracker and its status in the workflow setting.

As I hope one tracker issues is invisible to developers (a role) untill the status changes to "Reviewed", like following matrix:

Tracker	Status	Role	Visibile
Requirement	New	Dev	N
Requirement	Reviewed	Dev	Y
