<b>Description</b>			
Would be a useful thing to display as a column header to know if there are attachments. Redmine could/would dynamically determine if there are attachments.

IMHO there's no need for a new field, that can be done entirely in the view...

- Category set to Attachments

I posted a patch to [#15900](#). A clip icon indicates that there is attachments.

Redmine 3.4.0 and later have the ability to show "File" column in the issue list ([#25515](#)). You can know whether the issue has attachments or not by adding the column.
