

Redmine - Feature #12897

Separate "Filter" and "Options" settings for ticket views to allow different parallel settings

Resolution:	Duplicate		
Description It would be very nice beeing able to setup coloumn headers without changing filters and saving these settings. This way one would be able to define rules hwo to view the list and just add or remove predefined filters. Now it seems like only one filter at a time is possible			
Related issues: Is duplicate of Redmine - Feature #6332: "OR" filter and not only "AND" filter
