

Redmine - Patch #12911

Fix 500 error for requests to the settings path for non-configurable plugins

2013-01-20 03:47 - Harry Garrood

Target version:	2.3.0		
Description When a non-configurable plugin is specified in a GET or POST to /settings/plugin/:id, a NoMethodError will be raised, and Redmine will respond with status 500. The attached patch fixes this by rendering a 404 for both GETs and POSTs unless the plugin is configurable. It's based on trunk r11204 . I've also updated and added tests.
