Revision 1445 - 2008-05-23 18:29 - Jean-Philippe Lang

Fixed: error when previewing a new wiki page (#1292) introduced in r1415.

History

#1 - 2008-05-23 12:57 - Tommy Jensen

Please provide the version string for redmine, what database (and preferably version) you are using, if this happens in every project, and last but not least if you have migrated from an earlier version.

Thanks.

#2 - 2008-05-23 14:28 - Luca Pireddu

- version: HEAD, revision 1444
- database: PostgreSQL 8.2
- migrated from earlier version: yes
- every project: yes

#3 - 2008-05-23 14:29 - Tommy Jensen

When you upgraded, did you do a rake db:migrate ,and restart the server (mongrel/webrick/..) afterwards?
And between which revisions/versions did this error occur?

#4 - 2008-05-23 16:40 - Luca Pireddu

Migrated and restarted: yes.

Noticed the problem in a previous revision, but I don't know which one. I updated to HEAD ([r1444](#)) this morning (23/5/2008) and the problem is still there.
