Target version:				
Resolution:	Fixed		**Affected version:**	

Description

I've created a new wiki page. I haven't saved it yet. When I click on "preview" Redmine produces an internal server error. I'm using HEAD. Here is the relevant log output:

```
Processing WikiController#preview (for 156.148.120.93 at 2008-05-23 11:59:02) [POST]
  Session ID: 76182564b0927e5bbf6ecf86fb74f26b
  Parameters: {"commit"=>"Save", "action"=>"preview", "id"=>"pgds", "controller"=>"wiki",
 "content"=>{"comments"=>"", "text"=>"h1. Modelling genealogy", "version"=>"0"},
 "page"=>"Modelling_genealogy"}

Associated revisions

Revision 1445 - 2008-05-23 18:29 - Jean-Philippe Lang

Fixed: error when previewing a new wiki page (#1292) introduced in r1415.

History

#1 - 2008-05-23 12:57 - Tommy Jensen

Please provide the version string for redmine, what database (and preferrably version) you are using, if this happens in every project, and last but not least if you have migrated from a earlier version.

Thanks.

#2 - 2008-05-23 14:28 - Luca Pireddu

- version: HEAD, revision 1444
- database: PostgreSQL 8.2
- migrated from earlier version: yes
- every project: yes

#3 - 2008-05-23 14:29 - Tommy Jensen

When you upgraded, did you do a rake db:migrate ,and restart the server (mongrel/webrick/..) afterwards?
And between which revisions/versions did this error occur?

#4 - 2008-05-23 16:40 - Luca Pireddu

Migrated and restarted: yes.
Noticed noticed the problem in a previous revision, but I don't know which one. I updated to HEAD (r1444) this morning (23/5/2008) and the problem is still there.

#5 - 2008-05-23 18:27 - Jean-Philippe Lang

- Category set to Wiki

- Status changed from New to Closed

- Resolution set to Fixed

Fixed in r1445.
