Description

Hello,

I have more 500 users. All are in a group but when filtering or assign Issue we have all users sorted, then Groups.
I think an organization like that would be smart in user select :

Group1

User1 of Group1
user2 of Group1

Group2

User1 of Group2
User1 of Group2

sorted by groups then user

History

#1 - 2013-01-23 09:29 - Fred Giusto

And an user can be displayed in several groups. Not annoying...
