Current Version of RubyGems: 1.8.24  
Please upgrade Gems. Maybe this fix your problem.

Unfortunately, nothings changes, but gems now is 1.8.25:

ruby script/rails server webrick -e production  
  
=> Booting WEBrick  
=> Rails 3.2.11 application starting in production on <http://0.0.0.0:3000>  
=> Call with -d to detach

```
=> Ctrl-C to shutdown server

There's no assets directory indeed except maybe if you enabled the pipeline. And no Rails.png either.

You must have changed something in default configuration, please post your support questions in [Help](#) forum.
