Description I am using version 2.2.0, but the problem is in redmine.org current version also). I can reproduce it here: This is real revision: r11281 (link works fine) This is NOT REAL revision, just bulk data: commit:r1445535 (not linking, of course, as this is not real revision) And now again: this is real revision: r11281 (and You see - revision is not replaced anymore and any further.) r11281 r11281 r11281 source:some/file - does not work yet. But If you specify project: redmine:some:some/file - then it works, And revisions works again! :) r11281

#6 - 2013-01-29 19:25 - Jean-Philippe Lang

- Status changed from Confirmed to Closed
- Resolution set to Duplicate

I'm closing it as duplicate of [#12930](#). The fix solves this issue as well. Note that commit:r1445535 is not a valid tag, commit is interpreted as a project identifier. The correct syntax is r1445535 or commit:1445535 (without the r).
