

## Redmine - Defect #13005

### Can't link to changeset or source in repository that contains underscores

<b>Description</b>			
<p>If the repository identifier contains underscores (which is legal according to the help text when adding a repository) then the <code>commit:&lt;repo&gt; &lt;changeset&gt;</code> and <code>source:&lt;repo&gt; &lt;changeset&gt;</code> links will not be created. The reason is that the regexp to match the repository identifier is missing the underscore. The following patch fixes this:</p>
