Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.2
Resolution:			

Description

Hi,

after upgrading a redmine installation from 1.2.2 to 2.2.2 (security related) everything is fine with the exception of the git integration.

The repository view shows new files and the correct ages, but no author and revision. Also there are no new changesets in the project activities.

Here are some infos about the installation:

Environment:

Redmine version	2.2.2.stable
Ruby version	1.8.7 (x86_64-linux)
Rails version	3.2.11
Environment	production
Database adapter	MySQL

Redmine plugins:

redmine_backlogs	v0.9.35
------------------	---------

Here is the console output from the fetch_changesets call:

```
$/opt/redmine# ruby script/rails runner "Repository.fetch_changesets" -e production
(eval):108: warning: multiple values for a block parameter (0 for 1)
    from /usr/local/rvm/gems/ree-1.8.7-2011.03/gems/actionpack-3.2.11/lib/action_dispatch/routing/
mapper.rb:992
fatal: unrecognized argument: --stdin
fatal: unrecognized argument: --stdin
fatal: unrecognized argument: --stdin
fatal: unrecognized argument: --stdin
fatal: unrecognized argument: --stdin
fatal: unrecognized argument: --stdin
fatal: unrecognized argument: --stdin
```

And here the corresponding output from the production logfile:

```
Connecting to database specified by database.yml
OpenIdAuthentication.store is nil. Using in-memory store.
DEPRECATION WARNING: Calling set_table_name is deprecated. Please use `self.table_name = 'the_name
'` instead. (called from /opt/redmine/plugins/redmine_backlogs/app/models/rb_issue_history.rb:4)
DEPRECATION WARNING: Calling set_table_name is deprecated. Please use `self.table_name = 'the_name
'` instead. (called from /opt/redmine/plugins/redmine_backlogs/app/models/rb_sprint_burndown.rb:5)
git log error: git exited with non-zero status: 128
git log error: git exited with non-zero status: 128
git log error: git exited with non-zero status: 128
git log error: git exited with non-zero status: 128
git log error: git exited with non-zero status: 128

```

Any ideas?

Best regards!

History

git version 1.5.6.5

Redmine uses "git log --stdin".

[source:tags/2.2.2/lib/redmine/scm/adapters/git_adapter.rb#L200](https://source.rubygems.org/lookup/redmine/scm/adapters/git_adapter.rb#L200)

Please upgrade git to recent version.

- Status changed from *New* to *Needs feedback*

@ Tobias

Is this resolved for you?

Can you confirm, that Redmine works as expected after upgrade?

#6 - 2013-02-08 21:11 - Tobias Joch

After upgrading git to version 1.7.2 everything is fine. I think the wiki page <http://www.redmine.org/projects/redmine/wiki/RedmineRepositories> should be updated, right?

Thx for your support!
