Category:	Time tracking	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description <p>It would be very useful for us to be able to break Estimated Time down into Activities - for example a project with 10hrs estimated time might have 2hrs in 'Planning', 6 hrs in 'Development' and 2hrs 'QA'.</p> <p>By breaking this down we could then more easily see what activities are surpassing their estimated time.</p> <p>The interface could be a link to add 'estimated time' entries in the same manner as log time entries, but without the date.</p> <p>When looking at the report by activity, an extra column could be shown with what the estimated time would be.</p>
