Target version:	
Resolution:	
Description	
<p>In project settings, it would be nice to be able to select the list of attributes to be copied when using the "copy issue" action. I see in issue.rb source file the list of copied attributes is hardcoded</p> <p>For example I don't want "due_date" to be copied.</p> <p>What happens here is that 'lazy' users create new ticket by copying from the previous one they did, because it is on the same project with same context and has a lot in common. But they do not unset some fields I really want to start from the beginning.</p>

+1

Would like an option to leave checked or unchecked the option to copy attachments when doing copy issues.
