You can define users depending on the categories. Do you know that?

Non I don't know that, can you explain me in order to assign automaticaly a group when a user create a new ticket

#3 - 2013-02-12 08:49 - Daniel Felix

For example:

- go to your project configuration
- select ticket categories
- create a ticket category
- set "assigned to"
- save

Everytime a user selects the corresponding category, the selected group will be assigned after ticketcreation.  
This way, you can assign different groups for different ticketcategories.

This is just another way to manage your workflow.

Would this solve your problem?

Thanks for your answer, but not exactly. Indeed, my objective is that user don't have to do one click to assign the group. I want the group is assigned by default. I hope is more explicit

Ah okay. Well, this could be some idea, if the category could be set to default per tracker/project. What do you think about this solution?

Yes this is a good solution, is it possible with categories or assignment?

How can I do that please?

**#8 - 2021-06-27 04:25 - Go MAEDA**

- *Category set to Issues*
- *Status changed from New to Closed*
- *Resolution set to Duplicate*

The feature to set a default assignee per project has been implemented in Redmine 3.4.0 ([#482](#)).

**#9 - 2021-06-27 04:25 - Go MAEDA**

- *Is duplicate of Feature #482: Default assignee on each project added*
