Description
Rack recently reported a vulnerability: http://rack.github.com/ I'm running Redmine 2.2.2 and bundle show rack gives me 1.4.4. Is it necessary to upgrade the Rack version or is Redmine not affected by this?

Redmine does not define rack version in Gemfile.
You need to run "bundle update".

Sorry you're right. I'm used to Gemfile.lock being in the repo but it's not here. Would an item on News be helpful to remind people to check?
