Description

Hi,

I'm getting the apache error while clicking the "csv" link in timesheet report. I couldn't get the error while running webrick but not in apache. My error is "Request-URI Too Large The requested URL's length exceeds the capacity limit for this server. Apache/2.2.3 (CentOS) Server at 66.135.38.140 Port 80." . Can anyone please help me?.

History

- Description updated

corrected description.

#2 - 2013-02-12 08:53 - Daniel Felix

Can you provide some log entries (redmine/log/production.log) for example?

But this seems more likely to be a apache misconfiguration.

#3 - 2013-02-12 08:56 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

This is a plugin issue and closed as such, sorry.

I don't know this plugin but you should try selecting less data before clicking the 'csv' link.
