

Redmine - Defect #13185

Redmine claims RMagick is not available

2013-02-15 16:34 - Filou Centrinov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Gems support	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
The gem rmagick (2.13.1) is installed. I checked it with gem list. Image thumbnails are created in redmine, so rmagick is working too.			
Why administration information says that RMagick is NOT availble? (Screenshot)

Thumbmails are generated using shell ImageMagick command, not using rmagick gem.

Why administration information says that RMagick is NOT availble? (Screenshot)

Rmagick mustn't be included in your bundle, you can run bundle show and bundle config to make sure of that.

#2 - 2013-02-15 21:04 - Filou Centrinov

- File bundle_show.png added

As you see rmagick is included: [bundle_show.png](#)
Any idea, why redmine does not recognize it?

#3 - 2013-02-15 23:12 - Ivan Cenov

did you included rmagick bin directory in system path?

#4 - 2013-02-16 17:26 - Filou Centrinov

- Status changed from New to Resolved

My problem was already described in <http://www.redmine.org/boards/2/topics/2699> and [#10724](#). So it doesn't seems to be a redmine bug. However, until now I couldn't solve it. If I have more time I will try to figure out the problem.
