Target version:	
Description This is the german translation for r11404 , regarding issue #824 . I have to proposals for this. First: field_closed_on: Geschlossen am Which means closed on (but this doesn't seem to be translated like this in english) Otherwise, if you want it to hold it like in the en.yml, use: field_closed_on: Geschlossen I would prever the first one.
