

Redmine - Defect #13268

Invalid assignments possible when using REST API

2013-02-23 23:07 - Phillip Wieser

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.3
Resolution:	Duplicate		
<b>Description</b>  Technology stack: (Bitnami with Redmine 2.2.3-0-ubuntu-12.04 in VMWare Player)  Environment: Redmine version 2.2.3.stable Ruby version 1.9.3 (x86_64-linux) Rails version 3.2.12 Environment production Database adapter Mysql2 Redmine plugins: no plugin installed  Using REST API (XML) with curl  Description: Several invalid field values can be submitted which result in invalid assignments. For example, a category of "3" can be set, even though this category does not exist. Also, a negative integer value can be set. For example, "-3".  This applies to the following fields: Category_id, fixed_version_id, assigned_to_id.  Expected result: Invalid assignments are not possible and an error message is thrown			

History

#1 - 2024-03-14 16:23 - Holger Just

- Status changed from New to Closed
- Resolution set to Duplicate

I believe this has been fixed already:

- fixed\_version\_id: validation fixed in [#37171](#)
- category\_id: validation fixed in [#37171](#)
- assigned\_to\_id: validation fixed in [#23921](#)
