

Redmine - Defect #13268

Invalid assignments possible when using REST API

2013-02-23 23:07 - Phillip Wieser

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.3
Resolution:	Duplicate		
Description			
Technology stack: (Bitnami with Redmine 2.2.3-0-ubuntu-12.04 in VMWare Player)			
Environment:			
Redmine version	2.2.3.stable		
Ruby version	1.9.3 (x86_64-linux)		
Rails version	3.2.12		
Environment	production		
Database adapter	Mysql2		
Redmine plugins:			
no plugin installed			
Using REST API (XML) with curl			
Description:			
Several invalid field values can be submitted which result in invalid assignments. For example, a category of "3" can be set, even though this category does not exist. Also, a negative integer value can be set. For example, "-3".			
This applies to the following fields:			
Category_id, fixed_version_id, assigned_to_id.			
Expected result:			
Invalid assignments are not possible and an error message is thrown			

History

#1 - 2024-03-14 16:23 - Holger Just

- Status changed from New to Closed

- Resolution set to Duplicate

I believe this has been fixed already:

- fixed_version_id: validation fixed in [#37171](#)
- category_id: validation fixed in [#37171](#)
- assigned_to_id: validation fixed in [#23921](#)
