Redmine - Defect #13273

Making a copied ticket a child of the copying ticket results in an infinite loop at server side

2013-02-25 05:51 - Toru Haraguchi

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	2.2.2

Description

Need either of...

- Prevention on the form field
- Change in querying strategy against SQL backend

History

#1 - 2013-02-25 06:22 - Toru Haraguchi

How to reproduce

- Open a ticket "A"
- Click on "copy" link
- enter the ID of "A" into "parent ID" field on the form
- Click "send" button

#2 - 2013-02-25 18:47 - Jean-Philippe Lang

- Resolution set to Cant reproduce

Works for me. The child issue is created with its parent. Any plugins?

#3 - 2013-02-27 03:09 - Toshi MARUYAMA

- Status changed from New to Needs feedback

#4 - 2013-02-27 04:13 - Toru Haraguchi

Many plugins, but all in-house.
Will report what addition caused it, after investigating with outsource company.

#5 - 2013-03-01 08:48 - Toru Haraguchi

Firstly, "How to reproduce" was missing one important condition.

- Open a ticket "A" **with one or more child ticket**
- Click on "copy" link
- enter the ID of "A" into "parent ID" field on the form
- Click "send" button

Original Redmine 2.2.2 had different symptom, but **no infinite loop** .
The infinite loop was shown **only after the patch trunk-r11262.diff** is aplied.

Will report original Redmine 2.2.2 symptom on a separate ticket.

#6 - 2013-03-01 08:58 - Jean-Philippe Lang

Tested, works for me with current trunk.

#7 - 2013-03-01 12:24 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

- Resolution changed from Cant reproduce to Invalid

trunk-r11262.diff is in [#1005#note-30](#).
