Redmine - Defect #133

Changing issues when assignee no longer has access

2007-10-18 06:32 - Mark Preston

Description

Hi,

I hope there is no repetition here.

An issue (I) in project (P) was assigned to test user (T). T was removed from P. Then another user (A) tried to add a note to I and the system errored with an ActionController::DoubleRenderError in the issues_controller, add_note method.

The issue.save fails between the lines (113/114):
show
render :action => 'show'

Cheers,
Mark

PS, please see attached log of failure.

History

#1 - 2007-10-18 06:34 - Mark Preston

D'oh. The issue.save fails and add_note errors between
lines 113 and 114. Sorry!

#2 - 2007-10-18 12:08 - Jean-Philippe Lang

Fix is committed in r848.
Thanks for the feedback.
