Description

There is a problem with XMPP URI:
- xmpp:example@conference.example.net
- xmpp:example@conference.example.net?join
- xmpp:example@example.net?message
...

You can see on http://beem-project.com/ => beem@conference.elyzion.net

This is the production tracker for Redmine, a project management software. AFAIK, we don't use XMPP anywhere, grep -Ri on the sources doesn't return anything (why should it).
Are you sure you're posting in the right place?
