Description
Hello,

Great work!
Was not aware of your project, referenced from [http://trac.edgewall.org/ticket/31 Trac bug]

Some of the user of javascript make konqueror browser not working, I get a lot of errors.

Can you please use more standard javascript to allow more browsers to work?

Also, many people (including my-self) turn off javascript when browsing the internet, for firefox you can do this using noscript extension. As far I can tell, redmine cannot be used with javascript disabled.

Thank you.

BTW: How do you create descriptive reference to site so that URL is not shown? Your Wiki help page is missing.

Associated revisions

Revision 1605 - 2008-06-29 21:50 - Jean-Philippe Lang

Makes issue update link work without javascript (#1337).

Revision 1607 - 2008-06-29 21:56 - Jean-Philippe Lang

Redirects back after clicking watch/unwatch links without javascript (#1337).

Found! :)
Trac bug

I expected it to be wiki syle...

- Status changed from New to Closed

- Resolution set to Wont fix

Prototype doesn't seem to compatible with Konqueror: http://prototypejs.org/download

Please point to the exact problem as I am not a Konqueror user.

#4 - 2008-06-29 20:02 - Alon Bar-Lev

- Status changed from Closed to Reopened

For example, I cannot update this bug, pressing "update" causes:
line 327: TypeError: Value undefined

Also the issue search does not work you cannot add any filter (lots of errors).

I must switch to firefox in order to write this.

Can you please consider supporting scriptless clients? It will provide a solution for almost any browsers, and on Internet this is important almost all trackers (bugzilla, trac and mantis) support scriptless mode.
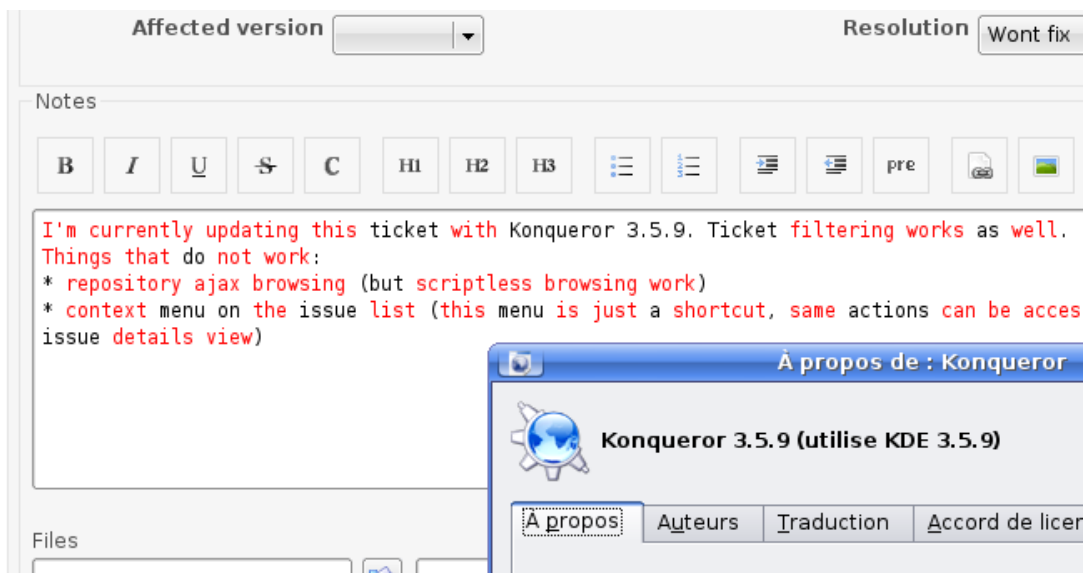

It is important that all users/clients/customers may have access to bug tracking system if it is available online without restriction on their personal configuration.

Thanks!

#5 - 2008-06-29 21:30 - Jean-Philippe Lang

I'm currently updating this ticket with Konqueror 3.5.9. Ticket filtering works as well.
Things that do not work:

- repository ajax browsing (but scriptless browsing works)
- context menu on the issue list (this menu is just a shortcut, same actions can be accessed from the issue details view)

#6 - 2008-06-29 21:31 - Jean-Philippe Lang

- File konqueror.png added

#7 - 2008-06-29 22:05 - Jean-Philippe Lang

Issue 'update' link now works with javascript disabled ([r1605](#)).
I'll see what I can do for filters.

#8 - 2008-06-29 22:32 - Alon Bar-Lev

I don't understand how it works for you.
I am also using 3.5.9 and never see the text editor. When I press update it jumps to the middle of the history and does not show the editor.
Strange... but I am guessing I am not the only one.
Thanks!

#9 - 2008-06-29 23:06 - Alon Bar-Lev

Just a thought... Maybe enable javascript debug messages:
Settings->Configure Konqueror->Java & JavaScript->JavaScript:Enable debugger, Report Errors
Then see if you getting some errors.
Thanks!

#10 - 2013-02-06 11:16 - Daniel Felix

- Due date set to 2013-02-13

Hi,

is this still a valid defect? Can you give some feedback? I'm not able to reproduce this. Since Redmine uses more jQuery, this could be fixed.

Please give some Feedback until next week. Otherwise i will close this issue.

Best regards,
Daniel
