Redmine - Feature #13373

copy a (sub-)project as "non-admin" user

Description

Hi there,

I haven´t found a way or workaround for the follow task:

- a normal user is allowed to create any projects (maybe the project *foo*)
- this user where added to *manager* role for this project
- this user also can edit his created project

So far, so good.

But I found no way that this user can copy his created project unless he is no *redmine-admin* (I only found the copy-dialog for projects under *administration menu* point :-/

Is it possible to set this right under *roles* ?
I only will allowed the user to get not *permission denied* error when he call http:// ... */projects/foo/copy*
Possible destination places for the project copy seems for me:

- all subprojects of source-project
- root (copy as main-project)
- any project where user has permission to create/edit project (nice to have, but not really necessary)

History

#1 - 2013-04-02 02:48 - Christian Buczek

There was already a plugin for deleting projects from their owner...

Delete Project plugin

> Delete project is a plugin which adds an ACL to allow non-admin users to delete their own projects.
> Author: Anthony Paul
> Latest release: 0.0.3, 2010-05-05
> Compatible with: Redmine 0.9.3
> Discussions: http://www.redmine.org/boards/3/topics/13521
> Public SCM: n/a
> Public ITS: n/a

source: http://www.redmine.org/projects/redmine/wiki/Plugin_List#Customer-plugin

But this is still offline (while only for 0.x version).I can imagine that both features has the same logic (for verify permission).

I got a dirty workaround which works for me:

./htdocs/app/controllers/projects_controller.rb
somewhere between line 20 and 30:

```
# CB: 2013-04-15 nachfolgend die Beschränkung, dass nur ein Admin ein Projekt kopieren kann, entfernt.
#
```

```
  # old: before_filter :authorize_global, :only => [:new, :create, :copy]
  # old: before_filter :require_admin, :only => [ :copy, :archive, :unarchive, :destroy ]
  before_filter :authorize_global, :only => [:new, :create ]
  before_filter :require_admin, :only => [ :archive, :unarchive, :destroy ]
```

now every user is abled to copy projects by entering the follows URL:

* http: //localhost/redmine/projects/PROJECT_HE_IS_INVOLVED/ **copy**

note: dirty workaround, because **every user can copy every project** when he knows the internal project-id. By copying a project in which the user isn´t involved, he also has no access to the copy of the project as long he didn´t set the flag 'public project' by copying :-/
