Description

hii, I am developing the tool for my company using php-API, I want to select one person detail, like in subject, I want to generate email to admin with single report on daily basis with info that any issue is solved after due date, issue updated by other assignees. issue is assigned by one person to another how can i get the detail of issue which was assigned to particular person but it is now assigned to another person(intermediate assignees detail), their updates.
