Redmine - Feature #13431

it would be nice to render the markup language in the "Repository" view

Description

hi, folks

as both github and gitlab can render the markup language (e.g. markdown, textile, etc.), and even better, they content of the markup file is displayed directly under the repo file list.

so it would be nice to have this github/gitlab like render, see attached screenshot

thanks

Implemented by [#29752](#29752) for Redmine 5.0.0.

> and even better, they content of the markup file is displayed directly under the repo file list.

The same feature is being tracked as [#12297](#12297).

I am closing this issue.
