

Redmine - Defect #1346

Link to PDF doesn't work after creating new issue

Description

After creating a new issue I get redirected to the issue's page.

The URL of the page ends with "/issues/show?id=xxx" like in:
<http://demo.redmine.org/projects/sandbox/issues/show?id=604>

When I try to download the issue as PDF I get an error 404 because the PDF download URL is:
<http://demo.redmine.org/projects/sandbox/issues/show?format=pdf>

I'd suggest that the redirect_to in IssuesController#new should omit the project_id so that Rails can build the URL without using the explicit parameter id=xxx but rather the default :controller/:action/:id like in:
<http://demo.redmine.org/issues/show/604>

Please see the attached patch.
