

Redmine - Patch #13486

Make height of "Commits per author" graph flexible

2013-03-15 16:34 - Anonymous

Target version:	
Description This patch changes how the the "Commits per author" graph is generated. Right now this graph is always 400 pixels high. But if a project has many contributor, say 50, then the result is that for each author, only 8 pixels are available vertically. The results ranges from looking cramped to being totally unreadable. The simple solution: Scale the graph based on the number of fields visible vertically. This resolves issue #1983 .	
Related issues: Related to Redmine - Defect #1983: statistics get rather cramped with more th... Closed 2008-10-03
