

## Redmine - Defect #13491

### Update RedmineInstall about support of ruby-1.8.7 (or not) in Redmine 2.2+

2013-03-15 18:27 - Gilles Cornu

<b>Status:</b>	Closed	<b>Start date:</b>

<b>Target version:</b>		<b>Affected version:</b>	2.2.3
<b>Resolution:</b>	Wont fix		
<b>Description</b>			
<p>While trying to install Redmine 2.2.3 with "standard / distro" ruby (1.8.7-p352) on Ubuntu Linux 12.04LTS 64bit, I faced unexpected "Error 500" when reaching some parts of the webapp, like these routes:</p> <ul style="list-style-type: none"><li>• /settings</li><li>• /my/account</li></ul> <p>After investigating in redmine.org for related issues, I found that reverting changeset <a href="#">r10844</a> (introduced for feature <a href="#">#12475</a> in <a href="#">2.2.0</a>) actually solved these problems (see patch details in <a href="#">#12861-12</a>).</p>			
<b>Questions / Proposals</b>			
<p>Is there any other solution than patch <a href="#">revert-r10844.diff</a> to be able to install Redmine 2.2.0+ with ruby-1.8.7 ? I know, that 1.8.7 sounds quite old a few days after ruby 2.0.0 came out, but recent operating system versions (like Ubuntu 12.04LTS) are still providing by default 1.8.7, hence the importance to decide if upcoming Redmine releases will be compatible with ruby-1.8.7, or not.</p> <p>In a first step, I propose to improve <a href="#">RedmineInstall</a> by removing support ruby-1.8.7 since Redmine 2.2.0 or put a warning and reference to a possible issue planning to restore support of 1.8.7.</p> <p>But maybe, there is a "pure configuration" way to make Redmine 2.2.3 run with ruby-1.8.7... if yes, that would be very useful to explain it in <a href="#">RedmineInstall</a>.</p>			
<b>Stack Details:</b>			
<p>My setup is using Redmine 2.2.3 on a stack based on Ubuntu Linux 12.04LTS 64bit, with following official distro packages installed:</p> <ul style="list-style-type: none"><li>• DBMS: PostgreSQL 9.1.8</li><li>• Ruby 1.8.7 (2011-06-30 patchlevel 352) [x86_64-linux]</li></ul>			
Required gems are bundled with Redmine Gemfile:			
<ul style="list-style-type: none"><li>• Rails: 3.2.12</li><li>• ...</li></ul>			
<b>Related Issues:</b>			
<ul style="list-style-type: none"><li>• "Breaking" Feature 'Lazy loading of translation files for faster startup': <a href="#">#12475</a>, since <a href="#">2.2.0</a></li><li>• "Error 500" Problem Reports where patch <a href="#">revert-r10844.diff</a>, is documented: <a href="#">#12861</a> and <a href="#">#12900</a></li><li>• Other Problem reports probably suffering of the same problem (both uses ruby-1.8.7): <a href="#">#12673</a> and <a href="#">#12739</a></li></ul>			
<b>Related issues:</b>

## History

#1 - 2015-03-05 07:03 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

I close this issue because both Redmine 2.2 and Ruby ~~1.9.7~~ 1.8.7 are no longer supported.
