| <b>Resolution:</b>   |                                  |
| <b>Description</b><br>1. create a fresh redmine install from trunk<br>2. rake db:migrate<br>3. rake redmine:load_default_data<br>3. login as admin<br>4. create a project "myproject"<br>5. edit this project in the wiki configuration sub tab, save a new "start page" Start<br>6. go in the wiki tab (you must reload the page to see it), just try to save the new wiki homepage and BOOM (see attachment for more information) :<br><br>Showing app/views/wiki/_content.rhtml where line #2 raised:<br><br>You have a nil object when you didn't expect it!<br>You might have expected an instance of Array.<br>The error occurred while evaluating nil.<<<br><br>Extracted source (around line #2):<br><br>1: <div class="wiki"><br>2: <%= textilizable content.text, :attachments => content.page.attachments %><br>3: </div><br><br>I've tried this with redmine Rev. 859 and rails 1.2.4/1.2.5. |                                  |

### History

#### #1 - 2007-10-21 11:54 - Nicolas Chucho

Hum, that was a problem between the seat and the keyboard (me).
