Redmine - Defect #13510

async_smtp isn't working for gmail

2013-03-18 15:56 - Jianrong SUN

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Email notifications		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	2.2.2

Description

Here is my configuration.yml about mail settings:

```
production:
  email_delivery:
    delivery_method: :async_smtp
    #delivery_method: :smtp
    smtp_settings:
      #tls: true
      enable_starttls_auto: true
      address: "smtp.gmail.com"
      port: 587
      domain: "test.com" # 'your.domain.com' for GoogleApps
      authentication: :plain
      user_name: "admin@test.com"
      password: "test"
```

When the delivery_method change to :smtp, everything works fine. But when using async_smtp, it returns:

```
>rake redmine:email:test[test] RAILS_ENV=production
  Setting Load (1.5ms)  SELECT `settings`.* FROM `settings` WHERE `settings`.`name` = 'sequential_
project_identifiers' LIMIT 1

- Status changed from New to Needs feedback

I think you have to use async_smtp_settings instead of smtp_settings.

#2 - 2013-03-18 19:34 - Etienne Massip

- Status changed from Needs feedback to Closed

- Resolution set to Invalid
