

Redmine - Feature #13511

Add a way to restrict access to the "Activity" feed for a particular role

2013-03-18 19:15 - Kyle Leber

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Security	Estimated time:	0.00 hour
Target version:			
Resolution:	Cant reproduce		
Description			
<p>The "Roles and permissions" screen has many options. But if I restrict access to certain types of information, those items still show up in the "Activity" tab when that user is logged in.</p> <p>For example: I created a role "Customer" that has no access to the repository. However, users with that role can still see revision commit activity from subversion in the Activity tab. They can also see issues they don't have access to.</p>			
Environment:			
Redmine version	2.0.3.stable

Where is the use case for this?
The user could still get the information.

But another idea could be the permission "view activity". Maybe I could provide a patch after my hospital visit.
I mark this on my watch list.

#2 - 2013-03-18 19:37 - Kyle Leber

My use case is I want to give a customer access to specific items without them having visibility into all of the ongoing activities. Thanks!

#3 - 2013-03-18 20:12 - Daniel Felix

Sounds like this is the same request just different described [#13512](#)?

#4 - 2024-02-27 19:14 - Holger Just

- Status changed from New to Closed
- Resolution set to Cant reproduce

The items shown in activity view and Atom feed are all filtered according to the current user's visibility, so that only activity which is actually visible to the user elsewhere is included there.

When checking the feeds, make sure to use the right atom key in the URL, i.e. the one of the checked user, not the one from an admin as the atom key identifies the user whose permissions are checked.

If you still observe items in the feed which should not be visible to a user, please re-open this issue and provide more information to allow us to reproduce this issue in a clean Redmine.
