

Redmine - Feature #1360

Permission for adding an issue to a version.

2008-06-03 13:56 - Curtis Stewart

Status: Closed	Start date: 2008-06-03
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues permissions	Estimated time: 0.00 hour
Target version: 2.1.0	
Resolution: Fixed	
Description	
<p>I have several projects with the customers and requesters entering there own requests, bugs, etc. similar to how the Redmine project is organized. I have been using the versions to plan roll-outs and in general that function works great.</p> <p>I have been having the same problem that I see on this site where the users are adding their issue to whatever target version they wish. I was wondering if there could be a permission added, maybe under issue tracking, like "Can Assign/Modify Version".</p> <p>The other way would be to add a set of statuses to the version such as "Open", "Locked", and "Completed" where we can specify what actions can be performed on the scope of a version.</p> <p>Thanks for such a valuable project.</p>

History

#1 - 2008-06-04 12:56 - Thomas Lecavelier

Duplicated from #1245

#2 - 2008-06-04 14:51 - Curtis Stewart

I did not realise that this was a duplication. I did a search for issues "all words" for "version status" and the issue did not show up.

I just redid the search with "status version" and both issues show up????

#3 - 2009-11-08 14:01 - Jean-Philippe Lang

- Category set to Issues permissions

The other way would be to add a set of statuses to the version such as "Open", "Locked", and "Completed" where we can specify what actions can be performed on the scope of a version.

This is committed in r3020. But I keep this ticket open since the original request was for controlling version assignement based on user's role.

#4 - 2012-07-15 18:29 - Jean-Philippe Lang

- *Status changed from New to Closed*

- *Target version set to 2.1.0*

- *Resolution set to Fixed*

Implemented as part of #3521. You can now control the permission on each field per role, tracker and status.
