

## Redmine - Defect #13606

### PDF and PNG export of Gantt loses issue numbers

2013-03-27 03:54 - Jason Palmer

<b>Status:</b>	New	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Gantt	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	2.3.0
<b>Resolution:</b>			
<b>Description</b>			
<p>The PDF and PNG export of Gantt chart loses issue numbers, which makes it difficult to find and update issues when someone comments on a pdf or png copy of the gantt chart (Redmine 2.2.X, 2.3.0).</p> <p>Also in the latest release (2.3.0), the relation lines (precedes/follows) do not appear on the pdf or png outputs.</p> <p>Ultimately, we would like this tool to be able to replace MS Project. In the interim, it would be helpful to achieve an emailable/printable soft-copy of the content that appears on screen, without losing content or context.</p>

(I'm very happy that "redmine\_better\_gantt" - plugin was implemented since Redmine 2.x; maybe anyone is able to realize this for exporting gantts )

In my opinion it would be a must to have the relation line in the export. For the issue numbers an option to select whether or not it should be included would be great.
