Description	
<p>When you are on the gantt page from a project, you can jump to the gantt page of an other project by selecting the project in the dropdown box. The same with calendar page.</p> <p>It would be nice if you can also switch the summery pages the same way. Actually, when you are on the summery page and you chose a project from the dropdown box you land on the issue overview page.</p>

What are you calling "Summery"?

Because being on the Overview page and using the dropdown menu to switch to another project leads you to its Overview page, AFAICT?

#2 - 2013-03-29 18:59 - Etienne Massip

- Subject changed from *Summery page jumping from project to project to Keep displaying issue summary page when switching project via dropdown menu*

Ok, I get it now, sorry for the inconvenience.

- File *13643.patch* added

To keep displaying 'issue summary page' when switching project,

It is necessary to add the new menu that links to 'issue sammary page' on project menu tab.

I made a patch to add a menu, with reference to #13653 and #23311.

#4 - 2018-10-18 09:50 - Takenori TAKAKI

- File *project_menu_reports.png* added

- File *issues_child_menu_reports.png* added

- File *13643_child_menu.patch* added

As another suggestion, I made a patch that adds a link to 'summary page' as a child-menu of 'Issues' on the project-menu.

child-menu version (attachment:"13643_child_menu.patch")
issues_child_menu_reports.png

project-menu version (attachment:"13643.patch")
project_menu_reports.png
