Target version:			
Description			
<p>Currently, the context menu (class="hascontextmenu") is not shown when right clicking on a link (<a>...), but it shown when right clicking on a link image <a>....</p> <p>Showing the context menu will hide the normal right click menu allowing, for example, to open the link in a new window.</p> <p>I'm not a javascript expert, but the proposed patch does the trick</p>
