Wrong language is shown in the Administration - Settings - Repositories - Applied Status selectbox then current language is English or Russian and may be other.			

History

#1 - 2013-04-02 17:11 - Etienne Massip

- Category changed from Translations to l18n

I don't know how but it looks like you selected the wrong locale fr when loading the default data set using appropriate rake task (see [RedmineInstall#Step-7-Database-default-data-set](#))?

#2 - 2013-04-02 17:12 - Etienne Massip

- Status changed from New to Closed
- Resolution set to Invalid

Closed as it seems to be a configuration issue, please reopen it if it's due to an actual bug.

#3 - 2013-04-02 18:41 - Zazvonnyh Alexsey
